

60 *Pinus ponderosa* / *Arctostaphylos patula* Woodland
Ponderosa Pine / Greenleaf Manzanita Woodland

Association:

-Pinus ponderosa / *Arctostaphylos patula*
Woodland

Photo Signature Example

Common species:

Juniperus osteosperma
Pinus edulis, *Pinus ponderosa*
Amelanchier utahensis
Arctostaphylos patula
Cercocarpus montanus
Purshia tridentate
Quercus gambelii
Quercus turbinella

Project Specifics:

Frequency = 2,434 total polygons
1,979 polygons ZION, 455 polygons Environs
Area = 21,531 total acres
15,744 acres ZION, 5,787 acres Environs
Average Size = 9 acres

Description:

This map class is widespread throughout ZION occurring on gentle to moderate slopes of various aspects at elevations between 5600 and 8000 feet. It is found on high mesa tops, plateaus and Navajo sandstone formation benches and basins. The photo signature for this class is distinct due to the open canopy of the ponderosa pine trees and the olive-green color of the manzanita. This type may intermingle with other manzanita and sparse shrub types common on slickrock and Navajo sandstone formations.
